

Katrice Mountford

Junior Software Engineer

SUMMARY

I'm a seasoned Product Manager turned Software Engineer, with a proven track record in startups and established companies alike.

I bring a wealth of experience in product strategy, design and international product launches and excel in understanding user needs and creating products that resonate.

Completing a full time intensive software development bootcamp, I'm a Full-Stack Engineer with a particular passion for the Front-End and crafting outstanding user experiences.

My diverse experience enables me to contribute a unique blend of technical and strategic acumen to Software Engineering, and I look forward to furthering my skills and collaborating with innovative teams to create outstanding solutions.

PROJECTS

2023

Meal Planner

Coder Academy

Python

Bash Scripting

A Python terminal app to help users plan daily meals based on their calorie target. From a CSV of recipes, the app automatically puts together 5 meals for a given day that total to be within an acceptable range of the given calorie target.

2023

Personal Portfolio

Coder Academy

HTML

CSS

Vercel

Figma

Built a fully responsive personal website to showcase my skills, achievements and experience.

EXPERIENCE

2023

Co-Founder & CPO

Talk to Maple (Antler VC Founder Program)

Flutterflow

Xano

OpenAI API

Built and launched a mobile Digital Companion, using low code tools with ChatGPT integration to the iOS & Android stores, gaining over 200 users in 10 days. Self taught low code front-end and back-end tooling (Flutterflow & Xano)

2022

Product Manager

Culture Amp

Identified key opportunities and defined the roadmap for the core Performance product; utilising customer interviews, customer success & marketing teams, product usage and revenue churn risk as key inputs to guide the direction.

2021

Product Manager

Surreal (FKA Muso)

Secured an additional \$750,000 in VC funding by formulating and presenting the international product strategy to investors. Applied technical prowess in implementing an analytics stack featuring Amplitude, Fullstory, Google Analytics, and Metabase to support UX activities.

TECH SKILLS

HTML

CSS

Python

Javascript

React

Node.js

Express.js

Git

SQL

PostgreSQL

MongoDB

OTHER SKILLS

UX

Product Design

Problem Solving

UI
